

AUTEX ACOUSTICS · ACOUSTICS

Autex Acoustics 3D Acoustic Ceiling Tiles

The ceiling that absorbs sound and compliments.

Autex's sculpted 3D ceiling tiles turn the most acoustically valuable surface in the room into a design feature — dimensional geometry that scatters and absorbs sound while giving the ceiling genuine architectural presence.

PLATFORMS & ROOM FIT

Ceiling grids & direct fix · Feature ceilings · Boardrooms · Collaboration & breakout spaces

SPECIFICATIONS

Performance	Dimensional profiles absorb and diffuse — attacking flutter echo that flat surfaces reflect
Design	Sculpted geometric patterns that make the ceiling the room's design moment
Formats	Standard grid drop-in and direct-fix options for feature areas
Material	Recycled PET fibre construction — light, durable, sustainable

HOW FOCUS AV DEPLOYS IT

- Specified for the reflection map of the actual room — feature zones over tables, standard grid elsewhere.
