

AUTEX ACOUSTICS · ACOUSTICS

Autex Acoustics Quietspace®Panel

The workhorse acoustic panel of Australian fit-outs.

Quietspace is the slimline absorption panel we design into walls and ceilings across Perth workplaces — high acoustic performance, a designer's colour range, and made from recycled PET that ticks the sustainability box honestly.

PLATFORMS & ROOM FIT

Wall & ceiling treatment · Direct fix or suspended · Meeting rooms & boardrooms · Open plan & studios

SPECIFICATIONS

Performance	High-NRC broadband absorption that tames echo and reverberation where speech clarity matters
Format	Slim panels for walls and ceilings — direct-fix, framed features or suspended treatments
Design	Extensive colour palette and clean edges that read as intentional design, not correction
Material	Manufactured from recycled PET fibre — durable, low-VOC, sustainability-report friendly

HOW FOCUS AV DEPLOYS IT

- Specified from acoustic measurement, not guesswork — placement targets the reflections the room actually produces.
- Installed alongside AV works so one visit fixes both what you see and what you hear.
