

BIAMP · CONFERENCING AUDIO

Biamp Parlé Microphones

Beamtracking mics that follow the conversation.

Parlé microphones track talkers with steered beams rather than fixed zones — in ceiling and tabletop formats, with the 2026 Voice Lift update reinforcing speech through the room's own speakers.

PLATFORMS & ROOM FIT

Devio UCX rooms · Tesira ecosystems · Teams & Zoom rooms · Meeting rooms to training spaces · Ceiling or tabletop

SPECIFICATIONS

Capture	Beamtracking technology follows talkers around the room instead of waiting in fixed pickup zones
Formats	Ceiling and tabletop microphones, plus Parlé conferencing bars with the same DNA
Voice Lift	2026 update with TesiraFORTÉ X: conversation-level speech reinforcement so everyone hears everyone, naturally
Ecosystem	Native to Devio UCX and Tesira — one design language from huddle to lecture theatre

HOW FOCUS AV DEPLOYS IT

- Coverage designed per room geometry, ceiling or tabletop per interior constraints, integrated to Devio UCX or Tesira.
- Voice Lift commissioned by ear in training rooms and lecture spaces — the reinforcement should be felt, never heard.
