

BIAMP · AUDIO DSP

Biamp TesiraFORTÉ X

Enterprise DSP, sized for the room.

TesiraFORTÉ X packs Biamp's enterprise Tesira processing into fixed-I/O units for individual rooms — the DSP behind serious conference audio, Parlé Voice Lift and rooms that integrate to the wider AV network.

PLATFORMS & ROOM FIT

Tesira ecosystem · Dante / AVB · UC platform integration · Boardrooms & training rooms · Divisible spaces
· Networked estates

SPECIFICATIONS

Processing	Tesira-grade DSP in fixed-I/O models sized per application — echo cancellation, routing and room logic
Scale	Room-sized units that network into full Tesira SERVER estates as buildings grow
Voice Lift	Drives the 2026 Parlé Voice Lift capability for natural speech reinforcement
Integration	Networked audio plus control integration into Q-SYS-class enterprise AV designs

HOW FOCUS AV DEPLOYS IT

- Designed into rooms where routing, reinforcement or division logic exceed appliance DSPs — programmed, commissioned and documented.
- Configured alongside Parlé capture and Desono playback for single-brand audio chains, or into mixed ecosystems where the design demands.
