

CRESTRON · WIRELESS PRESENTATION

Crestron AirMedia

Present without the cable hunt.

AirMedia puts wireless sharing and wireless conferencing in any room — laptops and phones present over the network with enterprise-grade security, and BYOD meetings borrow the room's camera and audio without a single dongle.

PLATFORMS & ROOM FIT

Windows / macOS / iOS / Android · Wireless conferencing (BYOD) · Enterprise managed · Every meeting space · Huddle to boardroom

SPECIFICATIONS

Sharing	Wireless presentation from laptops and mobiles — native apps, Miracast and AirPlay paths
Wireless conferencing	BYOD meetings wirelessly connect to the room's camera, mics and speakers — no cables, no dongles
Security	Enterprise network security postures, 802.1x and centralised management — built for corporate IT
Ecosystem	Pairs with Crestron scheduling and control; one management plane across the estate

HOW FOCUS AV DEPLOYS IT

- Deployed per room alongside native Teams/Zoom systems — scheduled meetings stay one-touch, ad-hoc and guest content goes wireless.
- Network integration designed with IT: VLANs, security policy and central management from day one.
