

CRESTRON • AI ROOM AUTOMATION

Crestron 1 Beyond Automate VX

The AI director for multi-camera rooms.

Automate VX watches who's speaking and cuts between cameras like a broadcast director — the Crestron 1 Beyond system behind the most talked-about hybrid rooms in the industry.

PLATFORMS & ROOM FIT

Microsoft Teams Rooms • Zoom Rooms • Production & capture • Boardrooms & town halls • Training rooms
• Multi-camera spaces

SPECIFICATIONS

Switching	Voice-activated camera switching — microphone position data drives automatic, broadcast-style cuts
Cameras	Orchestrates 1 Beyond PTZ and wide cameras; group framing plus individual speaker shots
Audio triggers	Integrates with Shure MXA arrays and other Dante mics as the positional brain
Platform	Feeds Teams and Zoom rooms as an intelligent camera source — certified workflows
Ecosystem	Native to Crestron control and management for room-wide automation

HOW FOCUS AV DEPLOYS IT

- Designed around your room's real geometry — camera positions, mic coverage and preset shots mapped seat by seat.
- Integrated with Shure MXA audio and your UC platform; tuned so cuts feel natural, not jumpy.
- The premium tier of our meeting-room practice — specified where the room's audience justifies production values.
