

CRESTRON · AV OVER IP

Crestron DM NVX

The enterprise standard for AV on the network.

DM NVX carries video, audio, USB and control on one secure platform over standard 1G networks — the AV-over-IP system enterprise IT departments actually approve, now with multiview and native H.264 WAN streaming.

PLATFORMS & ROOM FIT

1G networks · 4K60 4:4:4 · Multiview · H.264 WAN streaming · Enterprise & campus · Command & control · Higher education

SPECIFICATIONS

Performance	4K60 4:4:4 video with imperceptible latency over standard 1 Gbps networks using Pixel Perfect Processing
Current platform	DM NVX 380/384 series — the 384 adds native multiview windowing for monitoring and command walls
WAN reach	Native H.264 streaming (2026) extends content beyond the AV network — to WANs, recording and overflow
Management	DM NVX Director 2 for domain-based routing, presets and management at enterprise scale
Security	802.1x, AES encryption and Active Directory integration — built to pass an IT security review
Ecosystem	Native to Crestron control — room automation, touch panels and scheduling on the same backbone

HOW FOCUS AV DEPLOYS IT

- Designed with your network team — dedicated AV VLANs, multicast policy and switch specification signed off before rollout.
- Endpoint placement engineered per space, with Crestron control integration where rooms need automation, not just video.
- Director configuration, security hardening and as-built documentation at handover; supported under Focus Care.
