

CRESTRON • VIDEO BARS

Crestron Flex Videobar 70

Crestron's flagship bar for rooms that also want control.

The Videobar 70 brings Crestron's intelligent video and audio to medium and large rooms — with the unique advantage that the room's automation, shading and scheduling can live on the same Crestron backbone.

PLATFORMS & ROOM FIT

Microsoft Teams Rooms • Zoom Rooms • BYOD • Medium–large rooms • 8–14 people

SPECIFICATIONS

Video	Intelligent camera system with AI framing tuned for medium and large spaces
Audio	Stereo speakers and beamforming microphone array; expansion audio (including Flex Pods) for bigger tables
Platforms	Native Microsoft Teams Rooms or Zoom Rooms, with BYOD flexibility
Ecosystem	Lives naturally alongside Crestron control — lighting, shades, displays and scheduling in one integrated room
Expansion	Wireless, modular Flex Pods scale microphone coverage as room layouts change

HOW FOCUS AV DEPLOYS IT

- Specified where Crestron control is present or planned — we design the bar and the room automation as one system, not two quotes.
- Flex Pods placed to the table's real geometry; platform enrolment with your IT team.
- Integrated scenes at handover: one tap starts the meeting, drops the blinds and sets the lights.
