

FUSION SIGNAGE · IPTV & SIGNAGE PLATFORMS

Fusion Signage

Australian-built signage your team will actually use.

Fusion Signage is the browser-based CMS behind most of the signage networks we deploy — drag-and-drop scheduling, per-screen permissions and Brisbane-based support, at licensing that makes every screen affordable.

PLATFORMS & ROOM FIT

Browser-based CMS · Runs on commercial display SoCs & players · Reception to retail · Single screen to fleets

SPECIFICATIONS

Authoring	Drag-and-drop content and scheduling from any browser — no design degree required
Playback	Runs directly on major commercial display SoCs (Samsung, LG, Philips) or dedicated players
Permissions	Per-screen and per-user rights: reception's owner can't touch the workshop's safety brief
Local	Australian-built with Australian support hours — a call answered in your timezone

HOW FOCUS AV DEPLOYS IT

- Licensed, configured and templated at handover — your brand, your zones, your publishing permissions ready to use.
- Deployed on display-native players wherever hardware allows; training included because used signage is the whole point.
