

LOGITECH · BYOD & CONNECTIVITY

Logitech Extend

USB that reaches the rack room.

Extend runs USB up to 100 metres over ordinary Cat6 — freeing PC-based rooms and BYOD tables from the five-metre USB leash, with Logitech-grade reliability between camera and compute.

PLATFORMS & ROOM FIT

USB over Cat6 · PC-based & BYOD rooms · Large rooms · Equipment-room designs

SPECIFICATIONS

Reach	USB extended up to 100m over structured Cat6 cabling
Use	Connects room peripherals (cameras, audio) to compute that lives in racks or joinery far away
Simplicity	Transmitter/receiver pair engineered for the meeting-room job — no exotic cabling or config

HOW FOCUS AV DEPLOYS IT

- Specified wherever room-to-rack distance defeats native USB; run on certified structured cabling and documented.
