Logitech Sight

The centre-of-table companion for Rally Bar rooms.

Sight sits mid-table with AI cameras and seven beamforming mics, giving Rally Bar rooms a face-on view of every participant — remote attendees see the conversation, not the backs of heads.

PLATFORMS & ROOM FIT

Companion to Rally Bar / Rally Bar Mini · Teams & Zoom rooms · Medium-large tables · Deep boardrooms

SPECIFICATIONS

Cameras	Dual AI lenses covering the table in the round — the best face-on angle of whoever's speaking
Audio	Seven beamforming mics extend pickup to the centre of the table
Intelligence	Works with the room's Rally Bar: the system picks the best view between front-of-room and table level
Install	Table placement with a single connection back to the bar — no ceiling works

HOW FOCUS AV DEPLOYS IT

- Added to Rally Bar and Rally Bar Mini rooms where the table runs deep; placed and cabled cleanly with the room's existing system.
