

LOGITECH · WORKPLACE SENSORS

Logitech Spot

The sensor that tells you the truth about your floor.

Spot is a deploy-anywhere occupancy and environment sensor — presence, air quality, temperature and humidity reported into your workplace dashboards, so decisions about rooms and floors run on data instead of folklore.

PLATFORMS & ROOM FIT

Logitech Sync · Workplace analytics integrations · Rooms, desks and zones · Minutes to deploy

SPECIFICATIONS

Sensing	Occupancy/presence plus environmental metrics — air quality, temperature, humidity
Deployment	Compact, wireless-friendly mounting almost anywhere — no AV system required in the space
Data	Feeds Logitech Sync and workplace analytics — utilisation truth per room, desk zone or floor
Automation	Enables smarter behaviours: ghost-booking release, comfort alerts, energy decisions

HOW FOCUS AV DEPLOYS IT

- Deployed across rooms and zones as part of a workplace-analytics design — including spaces with no other AV.
