

NEAT · CAMERAS

Neat Center

The centre-of-table view that fixes hybrid meetings.

Neat Center sits mid-table and sees everyone face-on — a companion camera and mic that pairs with Neat Bars so remote participants stop watching the sides of heads and start sitting at the table.

PLATFORMS & ROOM FIT

Works with Neat Bar / Bar Pro · Neat Symmetry · Medium–large tables · Portable between rooms

SPECIFICATIONS

View	Centre-of-table camera captures every participant face-on, whatever the seating
Audio	Additional microphone pickup right where the voices are
Symmetry	Feeds Neat Symmetry: each in-room person framed in their own equal tile
Placement	Sits anywhere on the table, moves between rooms — no installation gymnastics

HOW FOCUS AV DEPLOYS IT

- Added to Neat rooms where table depth defeats front-of-room framing — boardrooms feel it most.
