

Q-SYS · CAMERAS

Q-SYS NC Series Cameras

Cameras that are citizens of the network, not peripherals.

NC Series cameras feed video natively into Q-SYS over the network — PTZ models with real zoom for big rooms, and the AI-equipped NC-90 G2 ePTZ for wide collaboration spaces — all orchestrated by the same core that runs the audio.

PLATFORMS & ROOM FIT

Q-SYS native · VisionSuite automation · UC integration · Multi-camera rooms · Training & council spaces · Wide collaboration rooms

SPECIFICATIONS

PTZ models	NC-12x80 (12x zoom) and NC-20x60 (20x zoom) network PTZ cameras for depth and detail
AI ePTZ	NC-90 G2 next-gen ePTZ with onboard AI and enhanced optics for smaller, wider spaces; NC-Pro15x extends the pro line
Architecture	Video lands natively in Q-SYS — no capture dongles, no USB extension gymnastics
Automation	All NC cameras deploy under VisionSuite for autonomous framing, presenter tracking and camera switching

HOW FOCUS AV DEPLOYS IT

- Camera positions designed to sight-lines and tracked against microphone coverage — the audio and video must agree about the room.
- Programmed into the Q-SYS design with presets per mode: meeting, presentation, hybrid council, recording.
