Samsung: The Wall

Samsung's MicroLED flagship — now install-friendly.

The Wall is Samsung's statement MicroLED platform: modular walls at any scale, and since ISE 2026 a 108-inch All-in-One whose split-panel design installs about as simply as two large LCDs — flagship LED without the flagship project.

PLATFORMS & ROOM FIT

MicroLED · Modular walls · All-in-One formats · Boardrooms & briefing centres · Lobbies & showrooms · Broadcast & premium venues

SPECIFICATIONS

Technology	Samsung MicroLED — self-emissive micro-scale pixels with the contrast and black levels LCD can't reach
Modular	Traditional The Wall builds scale to any size and aspect ratio, engineered panel by panel
All-in-One	2026's 108" MMF-A model uses a split-panel design that deploys like mounting two LCDs — days become hours
Processing	Samsung's AI picture engine drives upscaling and colour accuracy across the canvas

HOW FOCUS AV DEPLOYS IT

- All-in-One models specified for boardrooms and briefing centres; modular builds engineered structure-first like any serious LED wall.
- Calibration, content pipeline and control included — a flagship canvas deserves a flagship signal.
