

SHURE · TEAMS ROOMS BUNDLES

Shure IntelliMix Room Kits (MTR)

The Teams Room built around audio-first engineering.

Shure's complete Microsoft Teams Rooms systems: a Windows MTR compute with IntelliMix DSP built in, touch panel on the table, MXA902 ceiling audio overhead and a camera matched to the room — one certified kit per room size, from one audio-obsessed brand.

PLATFORMS & ROOM FIT

Microsoft Teams Rooms (Windows) · Small to large rooms · Four kit sizes · Ceiling-audio-first design

SPECIFICATIONS

Compute	Windows-based Teams Rooms compute with Shure IntelliMix Room DSP running onboard — certified, managed, no separate DSP box
Control	Touch panel on the table for one-touch join and full Teams Rooms control
Audio	One or two MXA902 ceiling arrays with integrated loudspeaker — the table stays completely clear
Camera	Huddly AI camera solutions matched per kit size
Deployment	Zero-touch provisioning — audio, video and compute auto-configure out of the box
Management	ShureCloud, Teams Admin Center and Teams Rooms Pro portal — IT sees everything remotely

HOW FOCUS AV DEPLOYS IT

- We size the kit to the room and tune the MXA902 coverage to the actual seating plan — automatic coverage gets you close, commissioning gets it right.
- Provisioned into your Teams tenancy (resource accounts, Pro Management) alongside your existing MTR fleet — it manages like any other Teams Room.
- Ideal where interiors demand clear tables: executive suites, legal boardrooms, architect-designed fit-outs.
