

SHURE · CONFERENCING AUDIO

Shure MXA902

Mic, speaker and DSP — one tile, one cable.

The MXA902 put a ceiling array microphone AND a loudspeaker in a single tile — automatic 6-by-6-metre coverage, IntelliMix DSP onboard, one PoE cable. The fastest route to premium clear-table audio ever made.

PLATFORMS & ROOM FIT

Microsoft Teams certified · Zoom certified · Dante / AES67 · Small-medium rooms · 6 x 6 m coverage · Clear-table rooms

SPECIFICATIONS

All-in-one	First combined ceiling array microphone + loudspeaker for AV conferencing — capture and playback from one device
Coverage	Single Zone Automatic Coverage: 20 x 20 ft (6 x 6 m) out of the box
Loudspeaker	Integrated 2.5" wide-dispersion driver tuned for intelligible speech reproduction
Processing	Onboard IntelliMix DSP — AEC, noise reduction, automix in the tile
Install	One device to mount, one PoE cable to run — cleaner, faster premium audio

HOW FOCUS AV DEPLOYS IT

- Deployed direct to certified Teams/Zoom rooms or into DSP ecosystems; coverage trimmed to seating at commissioning.
- The one-tile answer for interiors that forbid table mics and budgets that forbid audio projects.
