

SHURE · CONFERENCING AUDIO

Shure MXA925 Ceiling Array

The MXA920's successor, with AI in the tile.

MXA925 takes the reference ceiling array and adds onboard AI processing — AI echo cancellation, denoiser and deverb — for speech that stays clear through hard rooms, transcription pipelines and the most demanding hybrid spaces.

PLATFORMS & ROOM FIT

Microsoft Teams certified · Zoom certified · Dante / AES67 · Premium boardrooms · Voice-lift & tracking rooms · 9 x 9 m coverage

SPECIFICATIONS

Coverage	30 x 30 ft (9 x 9 m) default coverage with fast setup and steerable precision
AI processing	Onboard AI AEC, AI Denoiser and AI Deverb — echo, noise and room reverb handled in the array itself
Voice lift	Purpose-built for premium capture, camera tracking data and voice lift in modern meeting spaces
Transcription-ready	Clean, processed speech feeds AI meeting tools and transcription with fewer errors
Networking	Dante/AES67 over PoE; integrates with Q-SYS, Biamp and MTR/Zoom ecosystems

HOW FOCUS AV DEPLOYS IT

- Specified for new premium rooms and AI-heavy workflows; we'll tell you honestly when the MXA920 still fits the brief and budget.
- Coverage mapped to seating, AI processing tuned to the room's real acoustics, integrated to DSP or certified UC platform.
- Commissioned and documented, supported under Focus Care.
