

LOGITECH · CONTROLLERS

Tap IP Meeting Room Touch Controller

The whole room, one tap, one cable.

The table controller that makes rooms feel effortless: calendar, one-touch join and room controls on a 10.1" touchscreen, powered and connected by a single network cable.

PLATFORMS & ROOM FIT

Microsoft Teams Rooms · Zoom Rooms · Every room size · Table or riser mount

SPECIFICATIONS

Display	10.1" touchscreen, low-profile design that sits naturally on the table
Connection	Single Ethernet cable — Power over Ethernet for power, data and control in one run
Readiness	Motion sensor wakes the screen as someone approaches — always on when it matters
Pairs with	Rally Bar family and RoomMate rooms on CollabOS
Mounting	Table, riser or swivel mounts; cable retention for tidy installs

HOW FOCUS AV DEPLOYS IT

- We place Tap IP where the seat that runs the meeting actually is, with cable dressed through the table — not draped across it.
- Configured against your Teams or Zoom tenancy with the room account, so the calendar on the table is live from handover.
- Fleet-standardised: one controller model across all rooms keeps training at zero and spares simple.
