

LOGITECH · SCHEDULING PANELS

Tap Scheduler

The end of the double-booking wars.

A purpose-built panel at the door that shows whether the room is free, who has it next, and books it on the spot — green means walk in, red means keep walking.

PLATFORMS & ROOM FIT

Microsoft Teams · Zoom · Major booking platforms · Outside every meeting room · Glass, wall or mullion mount

SPECIFICATIONS

Display	10.1" touchscreen designed for hallway glanceability
Status	Green/red edge lighting readable down the corridor — no squinting at a screen
Booking	See details, book ad-hoc, extend or release the room right at the door
Connection	Single PoE cable; mounts to glass, walls and mullions with included hardware
Platform	Native panel apps for Teams and Zoom — pulls straight from the room calendar

HOW FOCUS AV DEPLOYS IT

- Mounted at eye height beside the door — on glass with the clean-mount kit, no drilling through the panel wall.
- Connected to the same room account as the system inside, so the door and the table never disagree.
- Rolled out fleet-wide it changes floor behaviour in a week: ghost bookings drop, ad-hoc rooms get used, facilities finally gets real utilisation data.
