

VITEC · IPTV & SIGNAGE PLATFORMS

VITEC IPTV & Digital Signage Platform

Broadcast-grade IPTV for organisations that can't drop frames.

VITEC builds the hardware-encoded IPTV platform trusted where video is mission-critical — live TV, in-house channels and digital signage delivered across your network with broadcast-quality reliability.

PLATFORMS & ROOM FIT

IPTV · Digital signage · Video walls · Low-latency streaming · Corporate & government · Venues & stadiums · Defence-grade environments

SPECIFICATIONS

Architecture	End-to-end platform: hardware encoders, central management, set-back boxes and video-wall endpoints on one system
Encoding	Dedicated hardware encoding for broadcast-quality, ultra-reliable channels — not software on a shared server
Content	Free-to-air, Foxtel/satellite, in-house channels, digital signage and video-on-demand in one lineup
Endpoints	Set-back boxes behind commercial displays, interactive TV portals, and multi-screen video-wall processors
Security	Proven in defence, government and finance deployments where content security is audited, not assumed
Scale	From a single building to campus and multi-site distribution over standard IP networks

HOW FOCUS AV DEPLOYS IT

- We design the headend around your real sources — FTA, satellite, streaming and in-house — and size encoding hardware for the channel count you'll actually run.
- Network integration is done with your IT team: multicast, VLANs and QoS configured so video never competes with business traffic.
- Endpoints installed and grouped per zone, with the management console handed over to your team — trained, documented, supported under Focus Care.

Supplied & installed in Perth by Focus AV — Solutions Focused.
